LEADS[®] iGM[®]

Providing Real-Time, Accurate Assessments of Your Surroundings

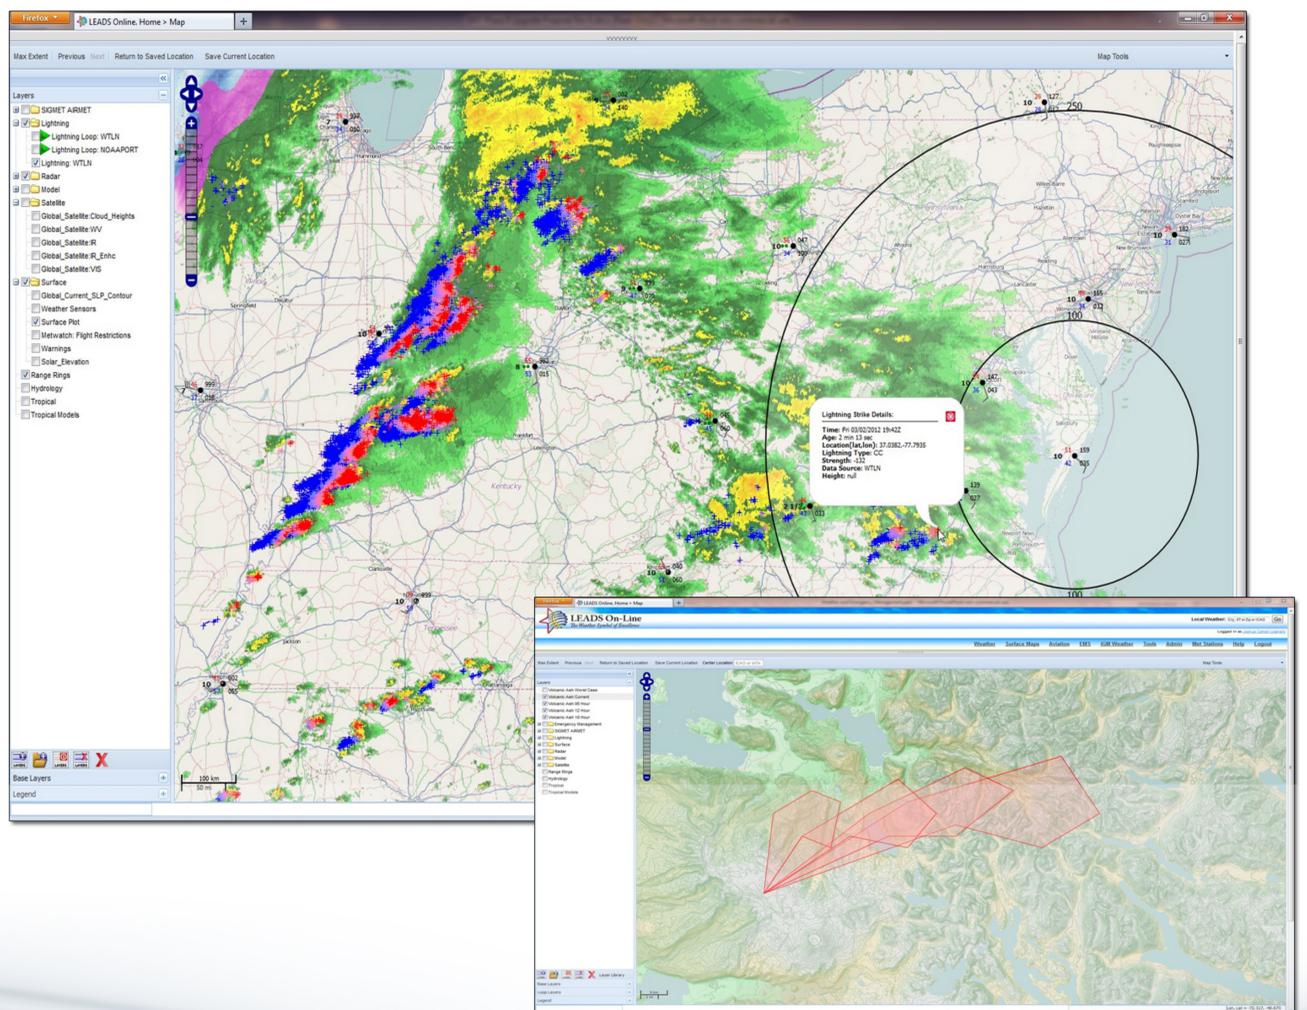

The Ultimate Situational Awareness Weather Display System.

The LEADS[®] iGM goal is to keep the user tightly coupled to the dynamics of the environment by combining data from multiple sources and bringing them into a single awareness display that helps describe the overall situation.

Having complete, accurate, real-time weather information is the foundation for successful decision-making across a broad range of complex and dynamic systems

Unique Solutions For Your Market Space...

- Meteorological Operations
- Aviation Weather Support
- Emergency Management
- Hydrology
- Power & Utilities
- Environmental Monitoring
- ATC Operations
- Space Launch Support
- Maritime Operations
- Construction Industry
- Agriculture
- Renewable Energy

LEADS® iGM®

Bringing Together Weather and Resources

MeteoStar's newest addition to our product line, LEADS® On-Line Interactive GIS Map (iGM®) is a complete web-based situational awareness display that allows the integration of not only standard hydro-meteorological data sets but customer unique data as well. As LEADS® iGM® is a web-based display, it can not only be accessed from multiple internal locations, but can also be made available to your customer base with a simple internet connection.

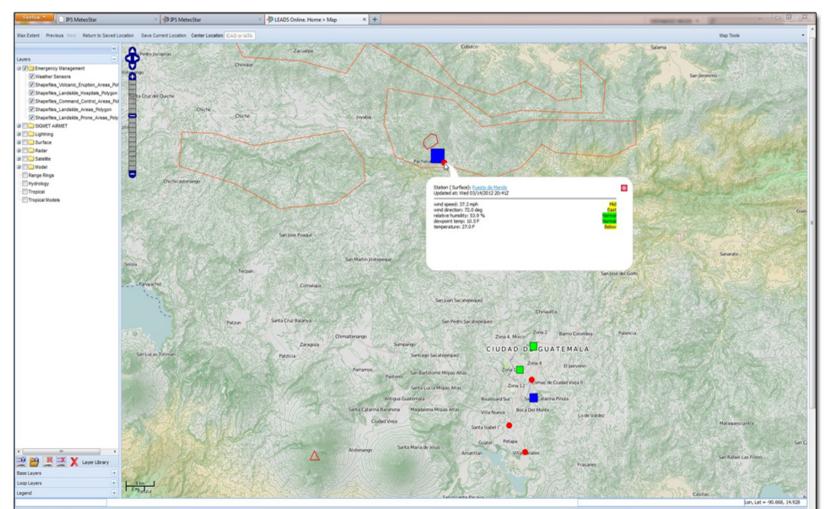

Emergency Management
